PROFILE

Senior Product Manager with 5+ years building B2C and B2B platform and marketplace tech. Specialized in AI/LLM integrations and agentic workflows, including a Jira-integrated LLM system that eliminated manual PM overhead at scale. Has taken products from 0 to 1 and proven it repeatedly: a native pricing engine, and platform expansion across 4 international markets. Moves comfortably between product strategy, technical architecture, and cross-functional execution, and thrives in early-stage, fast-moving environments where the product and the business are still being figured out together.

WORK EXPERIENCE

Senior Product Manager (04/2024 – Present) | *Draiver: AI-powered vehicle logistics, 4 global markets* New York, NY

- Reduced inbound stakeholder inquiries by 30% by designing an agentic LLM workflow integrated with Jira that auto-generated roadmap status responses covering queue position, sprint dates, effort estimates, and priority changes, eliminating PM involvement on routine status questions.
- Generated \$70K in annual savings for a flow serving 4,000 monthly users by designing pre-qualification logic that reduced onboarding drop-off and replaced a manual third-party identity verification step.
- Scaled the platform to 3 new international markets, partnering with Legal and Compliance on cross-border regulatory alignment, enabling 40% user growth without adding headcount to support operations.
- Led migration of 90% of account data from Salesforce to a native AWS microservice, maintaining 100% continuity throughout while eliminating dual-platform maintenance and reducing CRM licensing costs.
- Designed a multi-account trip engine enabling trip chaining across global clients, reducing OpEx by 15%; engineered a Salesforce-integrated microservice to automate proportional cost allocation, unit economics, and cross-team estimations.
- Productized a native pricing engine from 0 to 1, replacing legacy Python billing scripts and manual workflows with a configurable product layer; optimized custom configuration setups and reduced finance manual labor by 30%.

Customer Operations Manager (08/2022 – 03/2024) | *Draiver: AI-powered vehicle logistics* New York, NY

- Designed the CRM architecture, dashboards, and automated reporting infrastructure that the entire GTM org still runs on, establishing the operational foundation for a 30-person team.
- Boosted First-Call Resolution by 50% and CSAT by 27% by building the company's first internal knowledge base, structured around cross-functional user interviews and standardized SOPs.
- Reduced registration support volume by 70% by identifying and fixing the root-cause UX friction points, turning an ops problem into a product fix.
- Synthesized weekly QA intelligence for the C-suite, translating operational gaps directly into product requirements; improved procedural accuracy by 16%.

Senior Strategy Consultant (02/2021 – 07/2022) | *NPNA: international expansion strategy consulting* Guadalajara, MX

- Accelerated a \$300M acquisition by leading end-to-end adoption of proprietary B2B client software, ran boots-on-the-ground pilots and training that increased throughput 230% (from 1.2 to 4 units/day).
- Managed post-acquisition implementation and expansion into Canada, Brazil, and Mexico across legal, finance, tech, and marketing workstreams; laid groundwork for 5+ markets now live worldwide.
- Developed a US market entry strategy for a SaaS startup: TAM sizing, competitive benchmarking, site selection, and a launch roadmap targeting a \$200M+ addressable market.
- Reengineered 16 core business processes for a portfolio company, prioritizing a 60-item backlog and delivering KPI tracking, risk assessments, and mitigation plans to VP-level stakeholders.

EDUCATION

Tecnológico de Monterrey (08/2016 – 12/2020) *BS Industrial Engineering and Systems Engineering* Guadalajara, MX

One of Latin America's top-ranked engineering universities. Exchange semester at Boston University (2018).

ADDITIONAL SKILLS

Languages: Bilingual English/Spanish, conversational German

Certifications: Digital Transformation (BCG), Databricks AI Agent Fundamentals

Operations & Strategy: CRM administration, process optimization, Agile/Scrum, KPI tracking, market sizing (TAM)

Product: End-to-end lifecycle (Discovery to GTM), product strategy & roadmapping, OKRs, 0 to 1 product development, AI/LLM integration, agentic workflow design, data-driven prioritization, PLG (product-led growth)

Technical Skills: SQL, REST APIs, AWS (SQS, microservices), LLM systems, NetSuite, Salesforce (admin), Jira, Confluence
